① Seventh day adventist, Tichahau would not take  
2 pack cigarettes because was adventist, gave them  
3 crates fruit, + women some candy, <sup>1 cpl</sup> Richard a  
bag of mints,  
② Chugs floating, collect, ring (needs punch) <sup>very</sup> handsome

③ Broken oil line, attempted repairs

After first dredge haul, triangular dredge,  
with nothing much, but drag horn coral  
frag in it, when we got it it was side  
side now we can go to breakfast

Jacks aqualung saved our dredge, skin diving the  
other; Ouda also quite a swimmer, goes down to  
see how much holds, uses only face mask no "feet"

Dances paid for now like in Navajo country  
+ Africa, + must be arranged for.

(No touch. in milk back to girls homes)

Breakfast + lunch eaten. At 4:30 4 larvae  
after the heavy lunch we gave them.

Mareva:

- No radio <sup>need at least for receiving</sup>
- Leaky toilet, leaks at base in floor, + fills up night
- Refrigerator (hand operated) thermostat gone
- Auto pilot doesn't work.

It is Sunday evening Apr. 7, as I sit here in shorts in the pilot house of the Mareva (a 55 ft

It is as quiet and calm an evening as I have spent anywhere in this troubled world, balmy, cool and comfortable. The ship moored stern to is just a grassy strip from the main highway along the water front; across the street is a private residence, with just one shaded light in an upstairs room. To its left the Polynesian Hotel (Bamanga bunch) dropped from overhead in the Captain's cabin (and pilot house where I am sitting writing by the light of my flashlight suspended over-head, for our refrigerator thermostat-less is draining the batteries so that there isn't light enough to write by.)

brilliantly illuminated above it a dimly lighted second floor reception room and below an uninviting door way with bare stair leading up beside the shuttered "driveway" of the first floor warehouse over which the hotel stands. Little traffic passed by an occasional auto, & a few bicycles with their human cargo, French motor bikes quite noiseless compared to their brassy, noisy American counterparts. Many here are driven by a British drive upon the forward tire with a compact relatively silent aircooled engine. Next saunters by

a young couple hand in hand, summer evening lovers  
in summery Sunday garb, white lawn (dainty)  
dress and he in white shirt, and grey trousers.  
Barring <sup>himself</sup> the bikes you may be anywhere in his  
wide world temperate or tropic, Washington  
DC, Miami, Santos, Stanleyville or Nice. In  
the shades of night the vegetation doesn't  
show and there's nothing to tell you that you  
a stitting by the waterfront, the yacht harbor  
in Papete Tahiti, glamorous Tahiti of song  
and story and romance, <sup>The land</sup> of pleasant manners  
<sup>people</sup> Polynesian hula girls and dancers. It's just  
a <sup>Sunday</sup> quite evening <sup>on Main Street</sup> at home anywhere in the world  
<sup>Farther</sup> <sup>and out of ear shot</sup>  
Down town's Quins going full blast, the boys  
are there, dedering to the Sabbath day in the  
pants they are wearing, men's lotion on their  
st one and an underpin deoderant in the  
case of another. Funny business Sunday <sup>high</sup>  
when you're raised right, yet go to a cheap  
honky tonk (beer joint) and dance hall and  
drink cheap beer. Saturday night they  
went in shorts to nite in clean socks mind  
you. The ship is rising & falling slowly &  
rocky from side to side as though by  
a gentle mother's hand in French  
Oceania. <sup>may down the</sup>

Wed, April 10 / winter thurs day Apr. 11  
we got off at 2:07 after various  
delays. R. went for laundry to take to room. I  
forgot money, had to come back or delayed my  
getting to stores which close at 11, got all  
I was looking for except cash on deck or  
other small budget, because there we thought  
were too heavy to use on the other side.  
Afternoon was high & sunny and sea  
reasonably smooth, Chuck was first down.

Our first "delay" was over Jack Randall, not  
really a delay. His wife came out later in afternoon  
that Jack had high fever at that time  
after had attacks of couple of days duration  
that went away. I said if his side we shall  
go on anyway we were all set for go & would  
go through with plans; but side of Jack  
went with own dishes he said. ~~Was been~~  
in "bunk" (dorm. latrine) all day rested as  
reading book; This a.m. <sup>capt.</sup> has been on  
deck house seat <sup>at</sup> covered with Capt's blanket.  
Captains bunk on which he rests best  
stells at wheel.

Here at 10 a.m. Capt says when I asked  
for check how much longer he said 5 p.m.  
Chuck had answered in I passed his door  
I said to him maybe you'll be taking W. Agri  
instead of main hold on when you get back  
all of ~~got~~ was a warm smile

Brief glimpses of Tahiti by an out-  
sider looking in

Tahiti,

The Dula girls at Quinns = bar girls  
men who frequent Quinns are to all appearance  
a very lot, workers & what not around town  
certainly dressed like day laborers  
2000 Baa, darker, & perhaps not more  
dingy but in the semi-ruby blackness in-  
side, none of local color? Typical tropic  
dies & hazy looks. There is friendly ness  
& a kind of congeniality & hospitallity of Tahiti  
natives. Found in a bottle of beer in a  
beach joint. R. went every night after  
supper, but had to wait home and posted  
an office time as to speak.

Chuck repair flight to Hawaii

Butter argument

R. <sup>day later</sup> ~~expected~~ + light not being  
off, when he said they were on.

Apr. 11, Rough run; but moderated as we neared  
"Tiki<sup>ah</sup>" (?) running reef to pass on <sup>West</sup> N side (±) end, and anchored near Jack's favorite spot. Every body  
"ashore" on reef variety of corals astounding.  
(Sort of trial run — showed our disorganization and lack of [dry] space on ship.)

Lagoon so large you hardly can see other side  
as most or all series of connected islets.  
What keeps passage open?

"micro-atoll" his words  
As Jack Randall says an atoll within an atoll. This  
quite aptly describes look of this reef just East <sup>with 2nd Apr. 14</sup> of passage through large reef. We could walk around  
on summit of reef. Here I started crabbing  
coral & did not step outside 3 foot circle. It  
kept me busy & I got bucket full in no time.  
Rahde picked up two pieces that fell away from  
clump I grabbed before going aboard and as he  
he said to me I brought two pieces of coral for you  
two work over.

We had awfully late dinner felt sorry for  
crew it was 7 p.m. before we were able to eat.  
steak + potatoes & cereally on side. ~~last day~~  
<sup>green canned peas</sup> ~~peas~~ not quite cooked enough. <sup>camp</sup> ~~plum~~  
for desert (in glass for desert), then drink before  
time with dinner.

Jack got himself <sup>steamed</sup> some grouper on  
reef. He was working on stomach contents

Who ever reads these mixed up  
notes must realize that I scarcely had  
time to write any. Some done at 2 a.m.  
only time and place to write,  
Duke's bunk space in Bow of ship.  
Jack Randall sleeps in dining alcove bunk so  
no table available. Capt. in pilot house with  
Duke in "floor" (deck) + Chuck + Sam in state-  
room. No place to write, less to spread  
papers out.

to complete paper his writing  
+ needed additional specimens. Rehder +  
Tom paddled around with face masks +  
"duck feet". Apr. 12

Next a.m. I was busy sorting stuff Tom helped  
~~sort~~ as did Capt. after he got back from morn-  
ing visit from outer reef. That has isir  
chudz, Tom + Rehder made pile of stuff. Tom on  
his return helped me while Chudz + Rehder  
put away their stuff; got Rehder to make <sup>help</sup> list  
of box contents.

April 19<sup>th</sup> When I said over previous days and at Tiekahua that I wanted to use rest of our rotenone at places where Jack had not yet fished, I did not suspect that he did not want me to do it but to go home. Tried at first to persuade us to go Moorea first before Bora Bora, to use poison at good places. Well, he had so thoroughly covered that area that there would be little chance we'd find any tin, he had not already gotten. But when I insisted that we would go through with plans regardless of what was made, Bora Bora first. Nothing more he said for some time. Then just before supper he said ~~let me make you a proposition~~ <sup>let me make you a proposition</sup> here are some wrassers I want to get to photo and Rene (in Papeete) on (or near) quaranteen reef, if you will ~~let~~ <sup>poison</sup> me poison reef with your rotenone, I'll do job & get fish for you. Foolishly I agreed to this. I wanted to help him get his wrassers. I did not know that he had a sizable drum of amercinate with him (on his boat) Ok. Ok. so this morning at about 9 he began to mix up our rotenone

produced his large can, and ~~got~~<sup>begin</sup> getting things ready. The lunch went out exactly on time. But just before and after dinner came back from home. Presently 1:30. Cudross came back with buckets of fish, I asked 'any more?' Yes, a second bucket's ~~left~~<sup>left</sup> ~~and~~<sup>which</sup> ~~was~~<sup>was</sup> bringing out to ship, but he has made selection from all team collections. In other words he could call over every thing and segregate what ~~was~~<sup>was</sup> ~~any~~<sup>any</sup> that might anticipate the new ones that he may have already collected for Harry. I am if he didn't say to me on board [after 3 p.m. lunching] I mind if I pick and growl ~~over~~<sup>over</sup> I want to examine stomach contents, time he picked out the growlers but also all tiny odd fish ~~at these~~<sup>at these</sup> ~~replacement~~<sup>replacement</sup> set also for Harry. Well let were used for a good thing. I need

Copenhagen + fried  
 potatoes after dinner + after  
 coffee ate steak first  
 one day got ice cream ahead  
 of lunch / took  
 Cornelius Cronus boat  
 back with him  
 French line Portien

To buy his surplus, photos me, but  
he could neither sell or let me have  
any. Harry was mean guy, untrustworthy,  
didn't trust Schultz & etc. <sup>Sally</sup> today was  
can't recall when he gave me a set of  
the little ones had identical ~~little~~ <sup>little</sup> type  
gave him chance to check in what I  
was getting (took set, but he said of  
small things for <sup>B. & P.</sup> Harry. Well we got  
lot of common stuff didn't amount  
to hill of beans & all selected, picked  
over twice & little things identical to our  
be famous exactly when we <sup>are</sup> getting out  
of Hall Paul made for by & with  
me with an ~~return~~ <sup>return</sup>

At 2000 hrs left sea in <sup>run</sup>  
Today Monday 22, Behind left glass dish  
sitting right on deck but hatch cover  
and plates, would have thrown some one  
in dark.

Tomorrow filled we Sunday  
afternoon. I had left bags off  
list otherwise would have been O.K.  
If I had not injected all three milk  
fish pencil would not have forgotten it  
was the ~~one~~ not locked. Bought  
big steel drum yet much insisted &  
getting Randall's little (25 gal) one.  
And argument about it, I must be  
need to use larger drum & so we did after  
all.

Night of April 21. Heard of dance practice  
+ went to see it 8:45? to 9:45 girls  
team + mens team. Family + amateur  
girls 17-20 wanted daylight movie +  
arranged for them to come. Came nicely  
garbed by shy of putting on the wiggles/  
embarrassed same with girls in restaurant  
looking at brassiere, (blushed or at least acted  
like) (No touch when he tried put arm around.  
Like Suba girls miss men, all young and  
physically best spec. are rounded up to  
work on Mukatea leave this bunch rather  
lonely, could not ~~make~~<sup>set</sup> up any sort of men's  
team (dance troupe) Girls were two rows  
of 8 or 9 each; men had job to get 2 rows  
of five each + then most were not up to  
scratch. 1/2 of girls not much good either  
First girls and male bullet master. Then men  
with same man leader, showed them how to  
do down on hands, knees legs, feet right  
+ the right (one step is much like old  
hula trot) (knees back out forth  
 only hands are not put in knee

April 22nd cont.

Dance floor next to usual Thaples  
native house was former warehouse  
concrete floor. Orchestra was  
beat on two wooden blocks (tramped?)  
drum & tin can. In one of wigs  
dancers stepped up tempo till one  
girl <sup>actually</sup> wore out. did look very nice -  
and colorful in their dance costume

April

23.

First thing <sup>60</sup> <sup>Fisher</sup> lobsters & 2 <sup>20</sup> <sup>boy</sup> Scyllas  
then 2 Scyllas  
looked at getting Tahitian (Phillips)  
reed (1st "pass" to left of Sappete, sorted  
& put away, in rough passage was just  
dashed around in bunches.  
got through to Philip girls at 11 (about)  
Had lunch aboard. 11:15 to 1:30, 2 at-  
most cooked lobsters = bread & butter  
Limeade to drink, cooked rice with lots  
of butter. coffee & canned plums to  
finish up. Then could not get  
rid of them. stayed till about 4:30 <sup>15</sup>  
Capt had to chase them ashore. But  
after lunch about 1:30 (11-1:15) lunch  
we went up along shore in dinghy or  
3 girls went along to help and they  
did. one got me the record of 3 greater  
phylloids. Kids gathered around (as in  
Africa) & helped much work. Came  
back at 4 ± 5 and stuff. Capt  
brought 4 loaves bread, and loads  
with butter the girls had a stick half

a kind of loaf filled between with  
rolls of butter, ate up though they  
had had no lunch. I got worried  
their hungry and down before near  
my money + all as far as Rehe to  
watch the (with discretion) could  
not bring himself to do it + was  
so far as to ask Capt. could he  
trust them. Was more interested going to  
water bath to wash self + bath suit.  
Then slicked up hair + face. <sup>quickly</sup>  
Had to drive him to his husband  
before supper. Any way Capt. finally  
told girls to go home. Or help will  
put off their grass skirts all head  
red + white + blue + white <sup>wrap</sup> <sup>up</sup> <sup>in</sup>  
grounds. Well when they were home  
they all left their grass skirts behind  
to have excuse to come back.  
Wrote before Capt. left (after practice  
dance) the girls ~~dance~~ <sup>dance</sup> who promised  
to come back to dance for money  
not of horsefuge; to have her  
coming back. Their long skirts  
to go home, was some thing in

words, a pawn to name returning.  
They came back after supper all dressed  
up to go to dancing night, bus with  
2 benches (found that rattle word Pa-  
fect all the time, carrying passengers  
and freight

After practice dance of 22 one youth  
who lived beyond our anchorage, stopped  
off at murewa + we served him coffee  
+ linacade with fine blue juice in it  
used about a dozen cans ~~there~~  
four or more away, of it.

Then we walked (I didn't want to go  
but Capt. went + asked me along + I  
fell for it, to expecting to see inside  
of one or more homes, but when we got  
about to end (couple of miles walk)  
girls sat down on gravel coping  
on one side + we on other. After a while  
+ took some flash light + walky bus  
to murewa on dark in dark with  
road, flashing light on + off to name

not walking off side of road. Before  
long we turned up with girls  
again sat out on back deck, part  
time girls sang (I thought very  
nicely to make music for dance  
looked like walk to me for where  
I was in my bunk. One whispered I  
had brought tape recorder. The music  
lines. I stayed around till 12 some  
a was not one when the boys let girls  
go home alone, left the flash lights  
to get back with. I asked why  
didn't they go back half way with  
with them. Girls pulled on  
candles in room in bare feet as  
to feel their soles via carpet. &  
they were surprisingly soft, go  
in the foot all time. Large broad  
but perfect feet & nails, though  
often badly scarred; toes fairly  
short & stubby but well formed &  
of course no corns.

And had it for lunch  
day before too

- (A) No radio. People seemed to think there was one but no body knew what had become of it. There were two aboard when we first got aboard, but I guess they were taken by Bremen's crew. The afternoon we were analyzing our boxes at Donalds.

Had to shut one of my batteries (B) Auto pilot not working. No too important but would have been a big help.

(4#) Leak over my clothes locker about ruining my stamps & did spoil gummed labels. Leaked at Chuck's seat also.

late

(1) Oil line flew 3 times on 8<sup>th</sup> Mon. Tue. I was in at dining time. On Wed. 9<sup>th</sup> man came to repair. Thus. at 3:07 got under way.

(2) Ice box most unsatisfactory. Batteries were under charged. Had <sup>enough</sup> light enough to read by a refrigerator to keep meat with ice chest. could do with small refing. Compressor in two d- far from box (could not get right unit to mount directly under box).

(3) Toilet leaks on floor & fills up over night, one night it <sup>leaked</sup> within 4 in. of top when I caught it at 5 a.m.

(4) Leak <sup>leak</sup> around galley hatch (work). # leak, over <sup>clothes</sup> locker on port side, over after port corner of din. table. Made big wet spot in bed made up there.

(5) Generator belt was loose & needed re-  
newing, was not delivering current enough  
& line to shore does not seem to deliver  
enough current even occasionally use  
refrigerator.

(6) ~~Shut~~ Socket & switch <sup>dry</sup> in galley  
gave out, (we replaced with  
for line with shiggish but not at all good).

1  
Ripped over dry deck (Cupid for entry gun  
look the down + put in sun.

Self scissored and lying on wet deck +  
went off. Till I got after about uncreed  
for curms were always in danger of well.

Prefer tin cans to quart bottles for shipping  
2 1/2. Lg. for work or receipt glass bottles where chances of  
breakage are very great.

Run ashore for this a day or two. Know where gone  
or for what + do not mean night after supper. \*

10<sup>th</sup> Had to get sneakers mended with laces till the  
10<sup>th</sup> when ready to go on reef with 2 1/2. Som. + outboard  
shored off before got outboard planted, + Salina had  
grak on to pull the back.

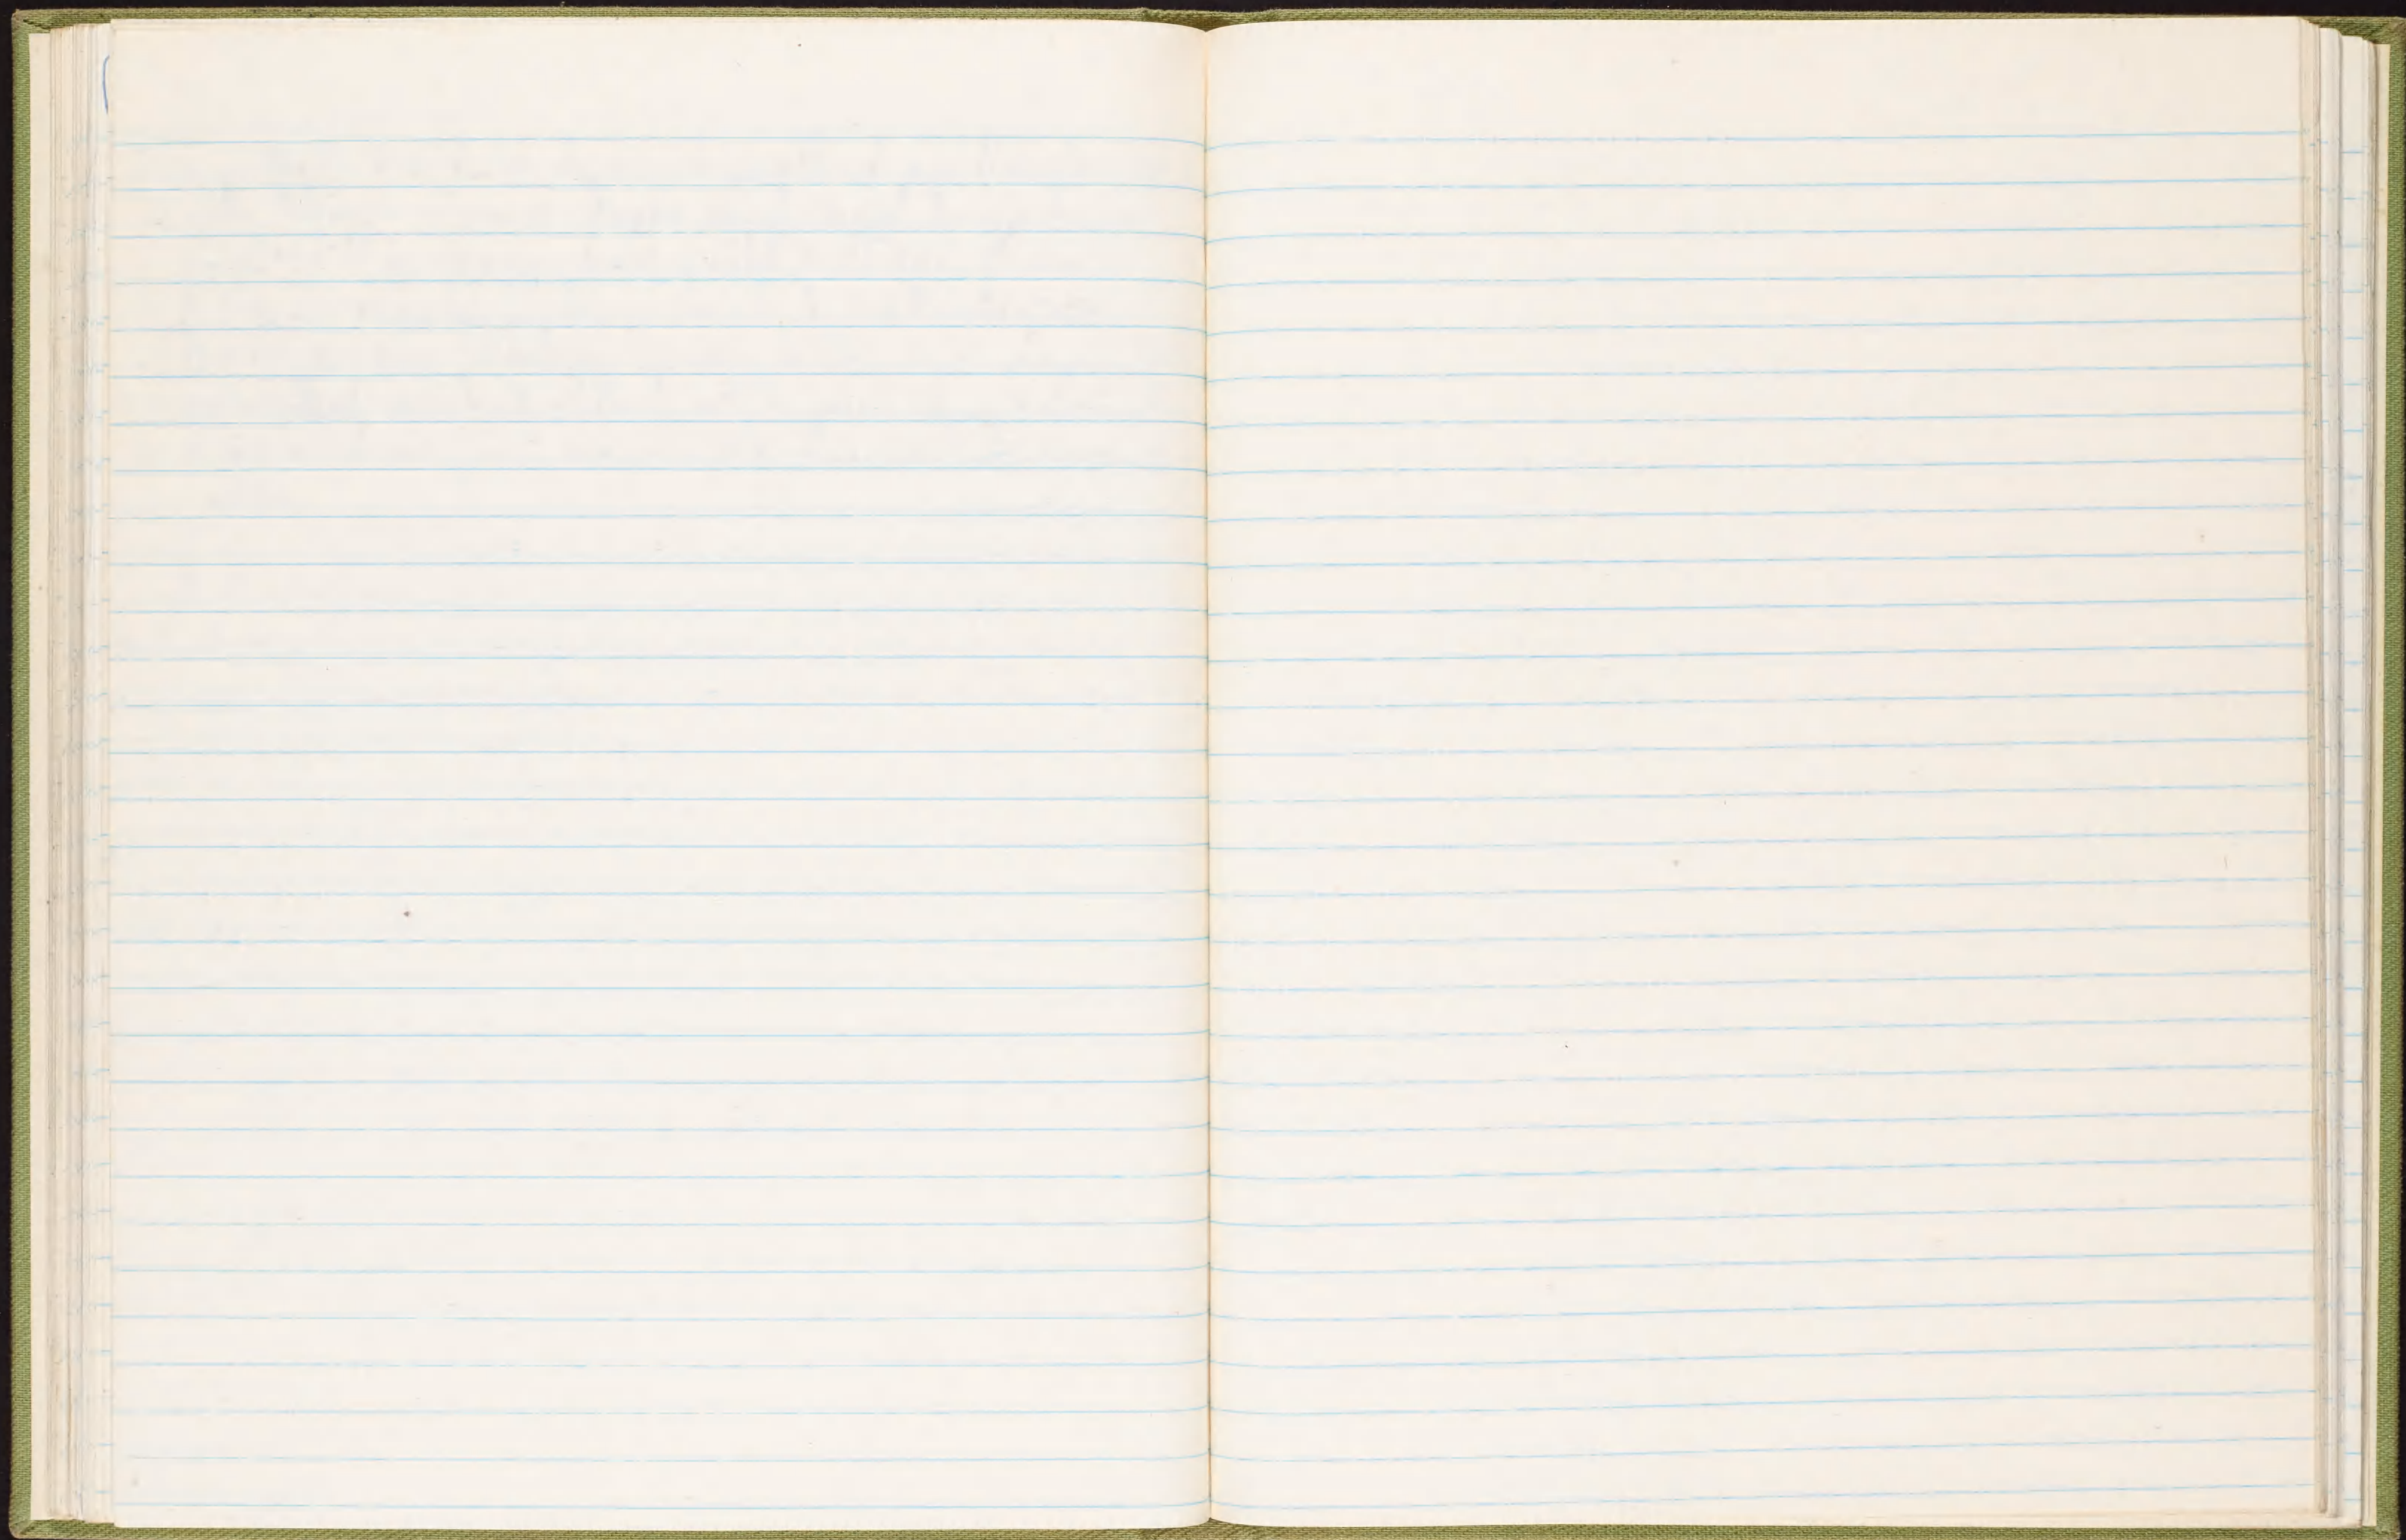

10<sup>th</sup> Rinder went ashore for laundry to take to room  
after going there in a.m. to get mended with laces  
just time after laundry left. Rinder home, 2nd  
time stayed till and stores close at 11 a.m.

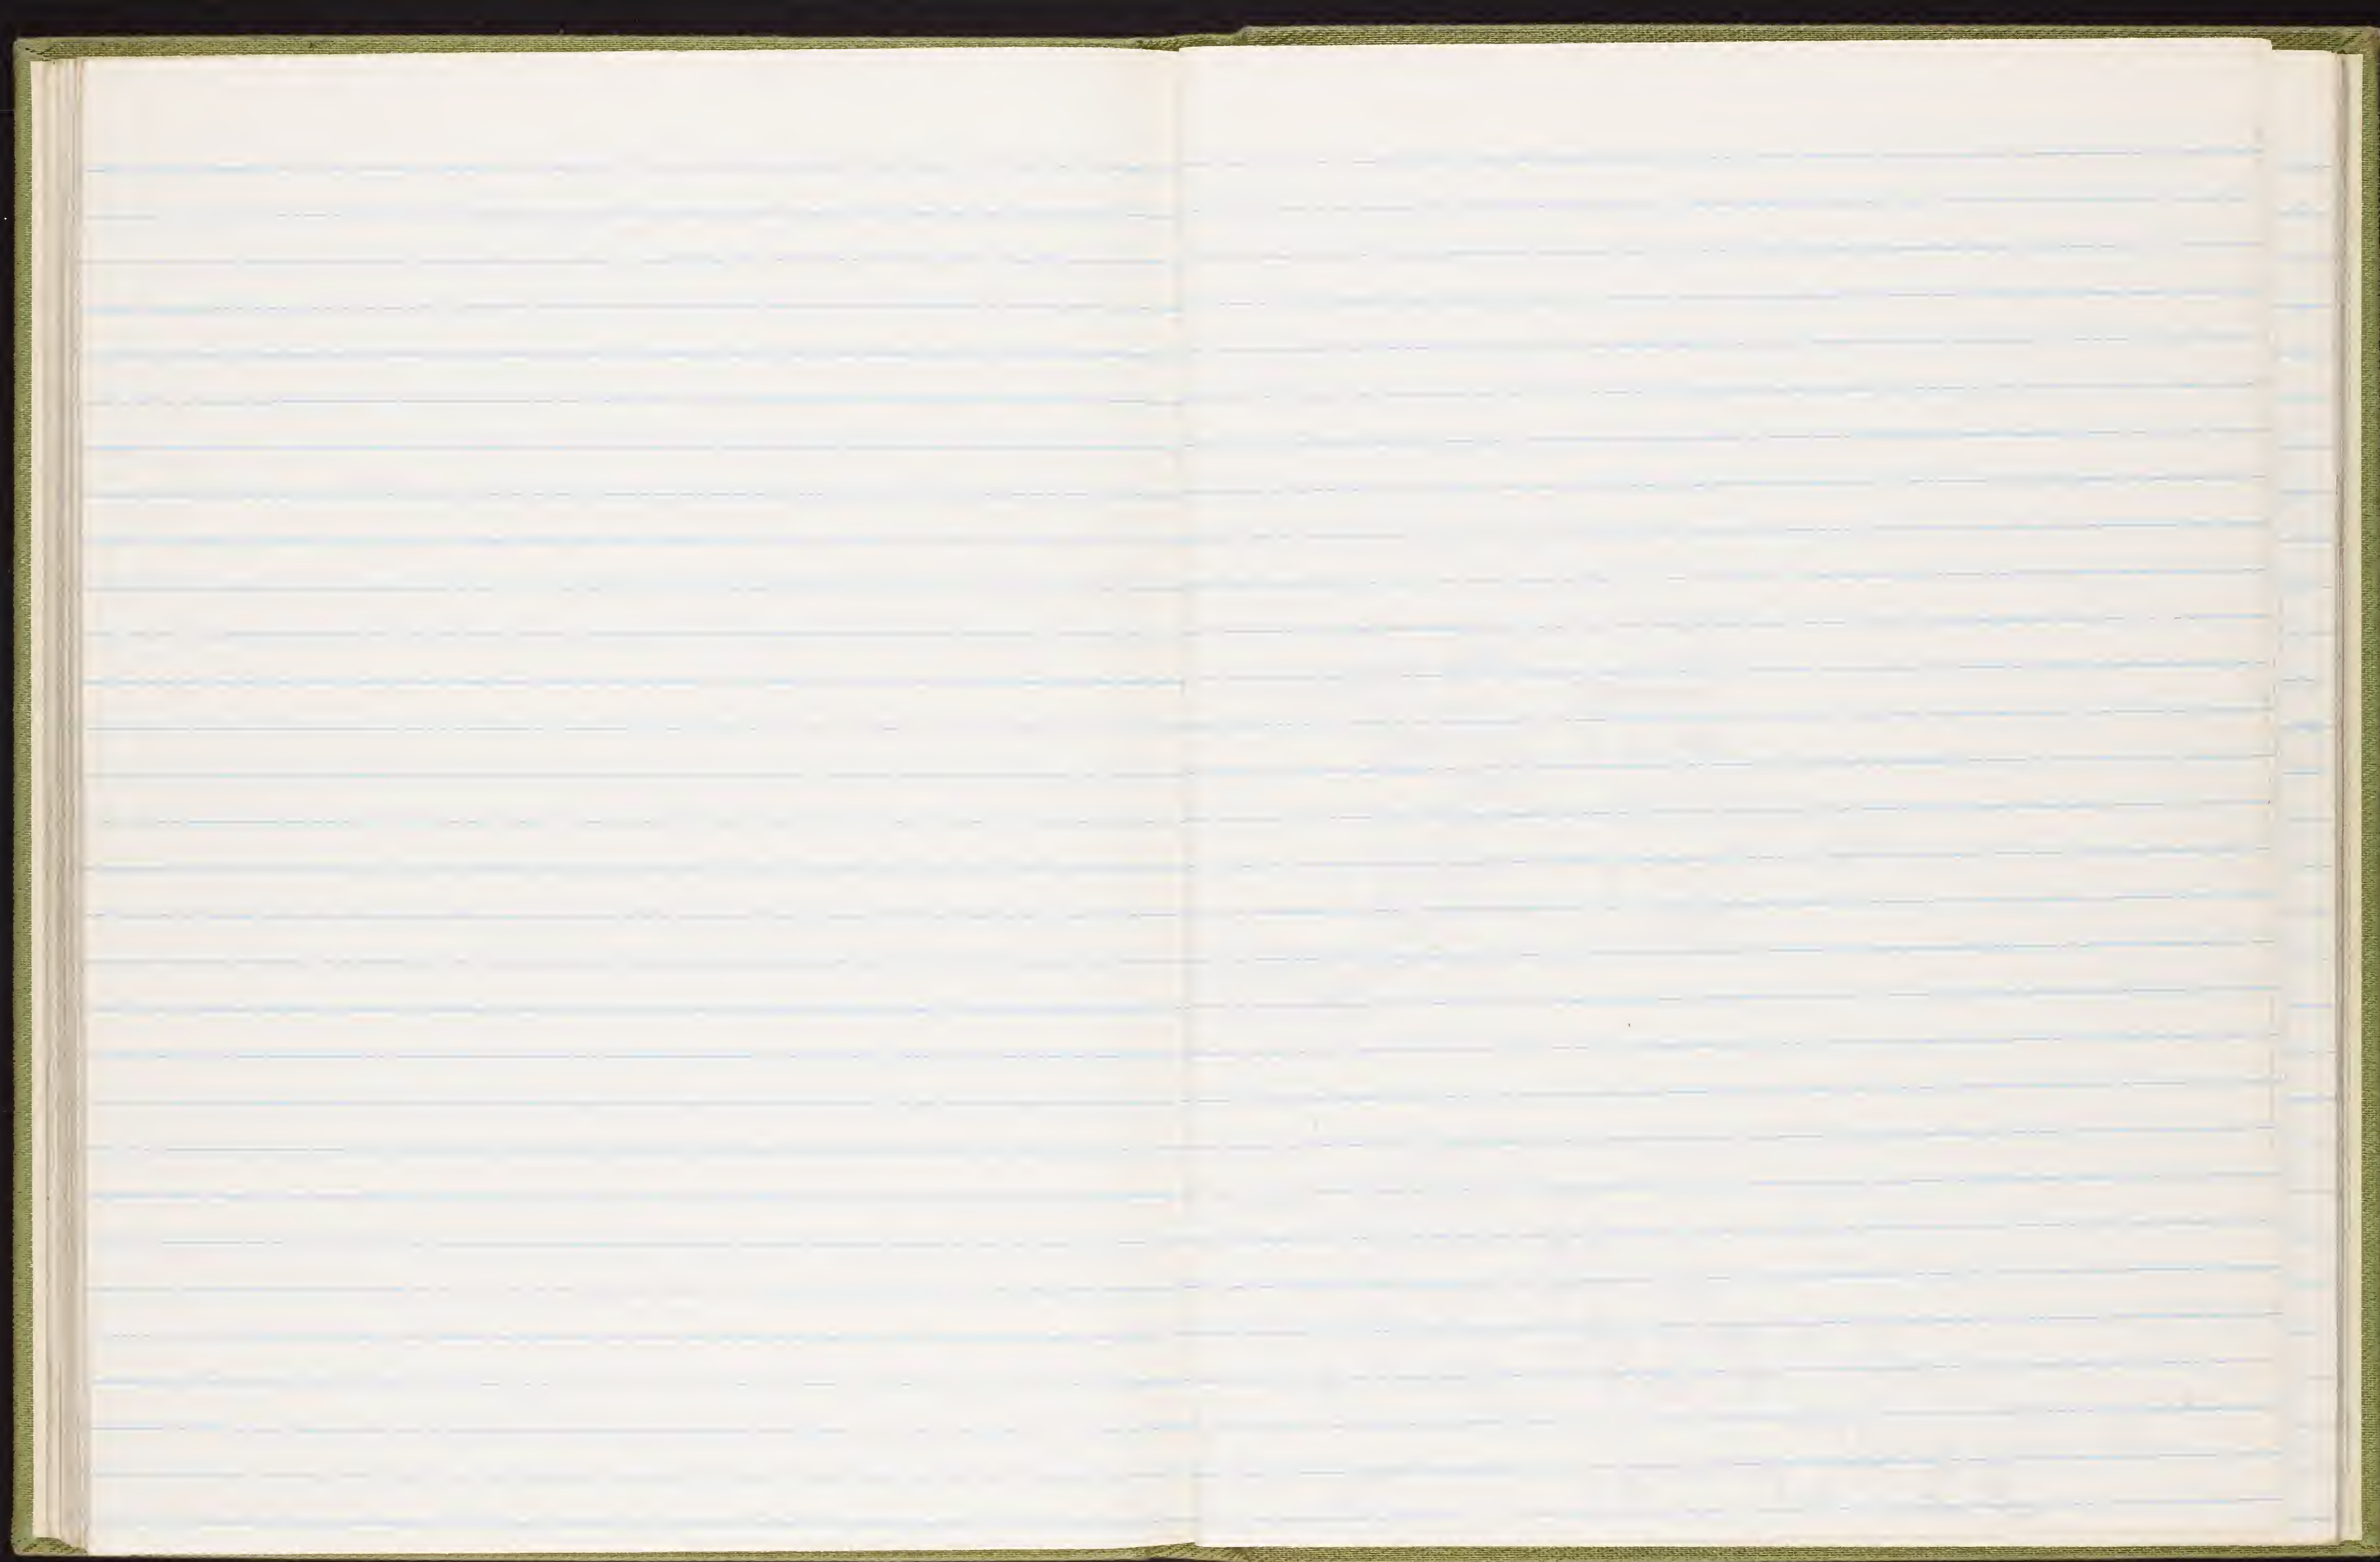

~~Apr. 11, 1957~~ Apr. 11, 1957  
Set rotenone up on high side of Salina's  
room on bench, and on top of that open  
cabinet of dozen quarts, number filled with  
formalin, dump over and leaked 1/2 qt of  
formalin solution on galley floor, +

! All formalin in one tank lost lot in 8 gal  
+ tank of mixture in 16 which sprung  
a leak.

! Always check lashing and tank fastenings  
regardless of whether you think they are tight  
(secure) or not.

Apr. 23 had to send prettyed up Rehder out  
with trap. Came back and said may have  
lost it in deep hole could not see float.  
(Face mask & bage (muslin) collector ~~carries~~  
carries no tools, rarely bottles, one day just  
grabbed bucket filled with jars of specimens  
so had no jar available for self or any one  
else.
